Build a Powerful, Easy-to-Use Basic Business Network at an Affordable Price

The key to succeeding in today's competitive business environment is investing resources wisely and getting the most value for your dollars. What if you could achieve business-class security and performance in your small business network without paying for advanced network features your network may not need? Now you can with Cisco® 200 Series Smart Switches. When you need to share network resources and connect computers, printers, and servers, but low cost is a top priority, Cisco 200 Series switches provide the ideal solution.

The Business Network You Need, at an Affordable Price

The Cisco 200 Series is a portfolio of affordable smart switches that combine powerful network performance and reliability with the entry-level managed switch features you need for a business network. These expandable Fast Ethernet or Gigabit Ethernet switches with up to 50 ports of connectivity provide basic management, security, and quality of service (QoS) at a great price. They speed file transfers, keep your vital business applications available, and help your employees respond more quickly to customers and each other.

Simplify Setup and Management

Cisco 200 Series switches are designed to be easy to configure, manage, and troubleshoot, allowing you to focus on your business priorities.

- Reduce the time it takes to deploy and manage your network with intuitive web-based interfaces
- Speed setup with easy-to-use tools such as Cisco Discovery Protocol, FindIT, and Cisco Smartports, which let your network automatically detect and configure all connected Cisco devices.
- Simplify your business by addressing all communication and connectivity needs with a single powerful Ethernet network that has been pretested to integrate with other small business technology products.

Gain Enhanced Features at the Right Price

Cisco 200 Series switches offer essential Layer 2 switch features at a much lower price than advanced managed switches.

- Simplify the deployment of voice, wireless, and video surveillance systems with automated QoS and voice VLAN features, and optional Power over Ethernet (PoE) connectivity.
- Meet all of your connectivity needs with more ports per Gigabit switch than other models on the market and expandable fiber-optic or Gigabit Ethernet uplink connectivity options.
- Prepare to meet tomorrow's business needs with native support for IPv6, which lets you take advantage of the latest networking applications and operating systems without having to upgrade your network.
- Reduce power consumption with "green" switches that employ power-efficient microprocessors and quiet, fanless operation in many models.

Protect Your Business Investment

Cisco 200 Series switches offer the reliable performance, investment protection, and peace of mind you expect from a Cisco switch.

- Safeguard your investment with a limited lifetime warranty and a solution that has been tested to deliver the performance your business demands.
- Solve technical problems right away with expert phone support through the Cisco Small Business Support Center and extensive online tools.

Simplify Network Growth Without Sacrificing Features

Experience the essential features of a managed switch without the cost or complexity.

A Powerful Foundation for the Basic Business Network

Cisco 200 Series Smart Switches help you build a business-class network for an affordable price. They provide just the right security, management, and QoS features you need to make the most of your business applications and productivity tools, without the costs or complexity of a managed switch. With the Cisco 200 Series switches, you can rest assured that your business applications and communication tools are resting on a strong technology foundation, so you can focus on achieving your business goals.

Table 1 lists the models in the Cisco 200 Series.

Table 1. Cisco 200 Series Smart Switches

Product Model	Ports	Expansion Ports	PoE
SF200-24	24-port 10/100	2 combo mini-GBIC*	
SF200-24P	24-port 10/100	2 combo mini-GBIC	o
SF200-48	48-port 10/100	2 combo mini-GBIC	
SF200-48P	48-port 10/100	2 combo mini-GBIC	o
SG200-18	16-port 10/100/1000	2 combo mini-GBIC	
SG200-26	24-port 10/100/1000	2 combo mini-GBIC	
SG200-26P	24-port 10/100/1000	2 combo mini-GBIC	o
SG200-50	48-port 10/100/1000	2 combo mini-GBIC	
SG200-50P	48-port 10/100/1000	2 combo mini-GBIC	o

*Each combo mini-gigabit interface converter (GBIC) port has one 10/100/1000 Ethernet port and one mini-GBIC/Small Form-Factor Pluggable (SFP) Gigabit Ethernet slot, with one port or slot active at a time.

Service and Support

Cisco 200 Series switches are backed by the Cisco Small Business Support Service, which provides affordable peace-of-mind coverage. This service helps you protect your investment and derive maximum value from Cisco Small Business products. Delivered by Cisco and backed by your trusted partner, this comprehensive service includes software updates, access to the Cisco Small Business Support Center, and expedited hardware replacement.

Cisco Small Business products are supported by professionals in Cisco Small Business Support Center locations worldwide who are specifically trained to understand your needs. The Cisco Small Business Support Community, an online forum, enables you to collaborate with your peers and reach Cisco technical experts for support information.

Cisco Limited Lifetime Hardware Warranty

This Cisco Small Business product offers a limited lifetime hardware warranty with return-to-factory replacement, a 1-year limited warranty for fans and power supplies, and a 90-day limited software warranty. In addition, Cisco offers software updates for bug fixes for the warranty term, and telephone technical support at no charge for the first 12 months following the date of purchase.
